DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

THE ABSTRACT:

a) Line 1, "An encryption key transfer system is provided. The" has been changed to --An encryption key transfer system, the---.

Allowable Subject Matter

2. Claims 1-46 are allowed.

3. The following is an examiner's statement of reasons for allowance: Although the prior art of record teaches methods and systems for loading encryption keys into automated banking machines, which includes a first automated banking machine for generating the keys, storing the keys into a portable medium, transferring the keys into a second automated banking machine, etc., the prior art of record fails to disclose or fairly suggests all the method steps, including generating a factory key responsive to at least one table data and to at least a first portion of a random information generated by the first automated banking machine, encrypting at least one encryption key by the first automated banking machine responsive to the factory key, etc. The limitations in conjunction with other limitations in the claims were not shown by, would not have been obvious over, nor would have fairly suggested by the prior art of record.
